Reg: Health care Violence – Public Bill urgently needed

Respected Sir,

Warm Greetings from Association of Physicians of India (API)

API is actively supporting your Mission of Isolation, Quarantine, Social Distancing, Hand washing procedures & pushing through our HCP & Public too to win over the corona War.

Physicians, Nurses & Healthcare professionals are working in the front line of the war against Corona Epidemic by offering tender care to the corona affected population in OPD, Isolation & ICU.

At this Juncture the recent violence upon the Doctors at Indore is hugely distressing.

Thanks for your twice condemning this inhuman behavior of anxious public.

Health care violence both in Public & Private Healthcare has become a frequent occurrence in our Nation. When effective system is in place to handle negligence if at all it is there, but people taking law in their hands is not acceptable.

Healthcare Protection Act is in place in 24 states of our country. After the Kolkata grievous incidence in June 2019 Medical Professionals & Junior Doctors firmly demanded a National Health care Protection Act to our Honorable Health Minister Shri Dr. Harsh Vardhanji . He also promised to get the act & formed an Inter ministerial committee.

The Association of Physicians of India

This committee requested the support of Indian Medical Association to draft the **Health Services Personal and clinical Establishment Bill 2019** & placed for viewers too. But now the Health Services Personal and clinical Establishment Bill 2019 has gone to be back bench for unknown reason.

Sir, it is the right time for our Honorable PM ji's Intervention to bring that bill as an act so that lot of confidence will be infused into the Doctors & HCPs so that they can offer effective care to the sick without hessitation or anxiety

We are Confident of our PMji's intervention & support sir.

Medical profession is expecting your immediate action in this regard.

Requesting our PMJi to Save the Saviours.

API & Medical profession offers our heartfelt thanksto you sir for introducing Health Insurance for Doctors & HCP handling COVID 19 Patients both in Public & Private sector .

Assuring the Best of our services to strengthen your hands to win over the corona war.

Thanking you sir

Regards & Respect

Prof Dr.S.Arulrhaj
